

PROJECT NAME: Utah State University Joint Research and Extension Programs in China

RECIPIENT: Utah State University

LOCATION: Logan, Utah

PURPOSE: Utah State University desires the expansion of partnerships with Northwest Agriculture and Forestry University (NWAUFU) and other institutions of higher education in the People's Republic of China. Funds will be used to further develop USU and NWAUFU's joint research programs in agriculturally-relevant crops and forages, turf grass, livestock cloning and genetics, water resources, and climate change. Discussions of potential areas of collaboration are ongoing with focus on embryo cloning of farm animals, turfgrass production, and pasture management.

AMOUNT: \$210,000
